

## Year 9 Term 5

Learning Aim	Developing	Securing	Mastering
Constructing	Interpret scale drawings	Use ruler and compass for constructions of perpendicular lines that bisect or pass through a point, constructing angles and 2d shapes accurately	<b>Apply knowledge of construction to loci problems</b>
Examples	A map scale is 1:1000. Measure the line and work out the real distance in KM 	 <b>Construct an angle bisector</b>	Draw a loci of points 2cm from the line 
Algebra	Solve equations that inc two or more steps, brackets and fractions. Solve inequalities and display on a number line	Solve equations & inequalities with variables both sides. Form and solve simple equations Rearrange formulae with one variable	<b>Solve quadratics by factorising</b> <b>Solve simultaneous equations</b> <b>Set up and solve equation that changes recurring decimal to fraction</b>
Examples	Solve and display your answer on a number line $3x - 5 < 22$	Solve $3(x + 2) = 5x - 3$ Make b the subject $P = \frac{3b+2a}{4}$	Solve the simultaneous equations $3x + 2y = 15$ $x + y = 5.5$

### Extension opportunities

**Rearrange with two variables that lead to factorising**  
**Solve simultaneous equations graphically**  
**Solve quadratics using the formula**  
**Work out more complicated surd questions**

You can find practice on all the topics taught this term at [Mathsworkout.co.uk](http://Mathsworkout.co.uk).
